

# Many Ways to Get AMPED

*Is your organization currently burning fossil fuels to meet any of the following energy needs? If so, you have an opportunity to electrify!\**

Here's a list of typical energy-consuming items that we use in our organizations. Which ones do you use and what type of energy do they consume?

## Building heating systems

- Electric heat pump**
- Electric resistance
- Natural gas furnace/boiler
- Other
- Does not apply

## Hot water heater

- Electric heat pump**
- Electric resistance
- Natural gas furnace/boiler
- Other
- Does not apply

## Cooktop/oven

- Electric induction**
- Electric resistance
- Natural gas
- Other
- Does not apply

## Other energy consumption sources

- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

## Equipment/tools (forklift, lawnmower, chainsaw, boilers for industrial processes, dryers, etc)

- Electric plug-in**
- Rechargeable battery**
- Gas-powered
- Other
- Does not apply

## Vehicles: the cars and trucks your organization owns

- Electric**
- Plug-in hybrid**
- Hybrid
- Combustion engine
- Does not apply

## ***Don't have any organization vehicles?***

You can still help electrify vehicles by installing charging stations for your employees and customers.

---

## Take Action

- Get educated on electrification solutions that are applicable to your organization through [AmpedProject.org](http://AmpedProject.org)
- [Sign up here](#) to receive news and information from the Amped campaign that you can use to support your beneficial electrification transition.

---

*\*The purpose of this worksheet is to get you thinking about where your organization is currently using fossil fuels and where you have the opportunity to electrify, but it is definitely not a substitute for a comprehensive energy audit!*

AMPED is a community-led initiative promoting the use of carbon-free electricity to meet our energy needs. Because the majority of our area emissions come from building heating systems and on-road vehicles, the focus of the campaign is to encourage and support the transition of area organizations' buildings and vehicles to technologies that are powered by carbon-free electricity instead of fossil-fuels. The campaign encompasses a 9-county area in the New York Finger Lakes Region including Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming and Yates counties.
